

## Activity 18:

### Aim:

## Values Reflection Space To develop a reflection space

You will need – A selection of art and craft materials, pictures, posters, stories that relate to your value, different sorts of materials, longs and wood, LED candles, music, pens and pencils, bean bags and cushions.

Activity - Design a reflection space for a value

First you must decide on the value you would like to concentrate on. A reflection space can be designed any what you like but we fell there are certain things that you need in every reflection space. Your reflection space must be in a quite area in the hall or classroom. You must have some pictures or quotes for children and adults to think about. Bean bags or cushions make it comfortable for children to sit quietly to read and think. It is good to have a basket or box for children to write prayers, you could also hang prayer on a prayer tree in the reflection space.

We have a reflection space in every classroom.

This is our main reflection space in the Hall.
